

PM COMPLIANCE REPORT

The numbers below represent the number of PM's that were completed during the month indicated. PM's are hierarchical, which means if your vehicle was in for a PMC, PM's A & B are considered completed also. This means you may have only 1 vehicle that was PM'd during the month but if the PM done was a C the report indicates that 3 PM's were completed. The percentage indicates the number of those PM's completed that were considered compliant (i.e. if a vehicle's scheduled PM's are A-32,200 B-32,100 and C-32,000 and the vehicle is brought in at 32,150 for a PMC both the B and C would be considered NON-Compliant and only the A as Compliant, resulting in a Compliance rate of 33%).

If your department did NOT have any PM's or Emission tests completed during the month it will not be listed on this report. It does not mean that you did not have any that were due, just none completed. The PM and Emissions due notice is sent out at the beginning of every month.
